

Manual pairing via fixed Luna

1

Press both side buttons simultaneously until you hear a beep.

2

Press the button on the M5 once.

3

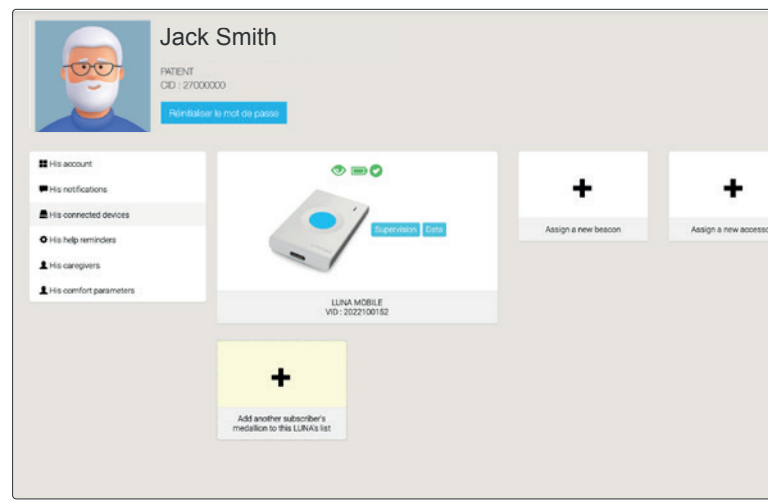

A red LED flashes on your M5 and your Luna emits a beep. Pairing has completed successfully.

4

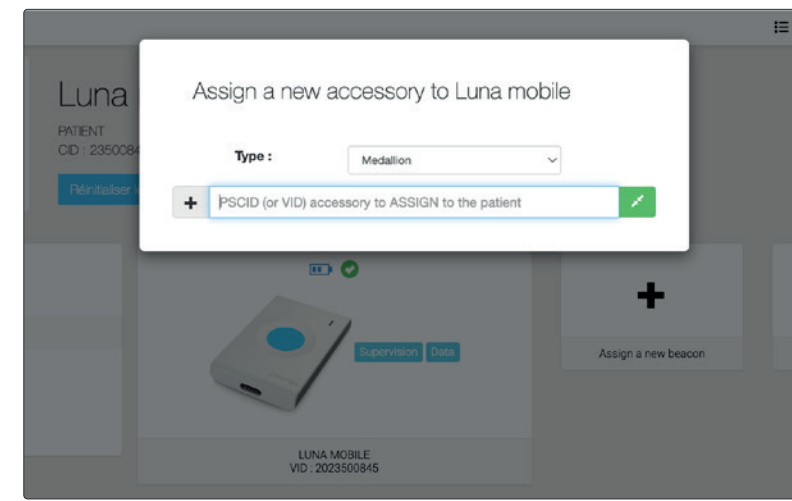

Press both side buttons simultaneously again until you hear a beep to exit pairing mode.

Pairing via the MyATTENTIVE platform

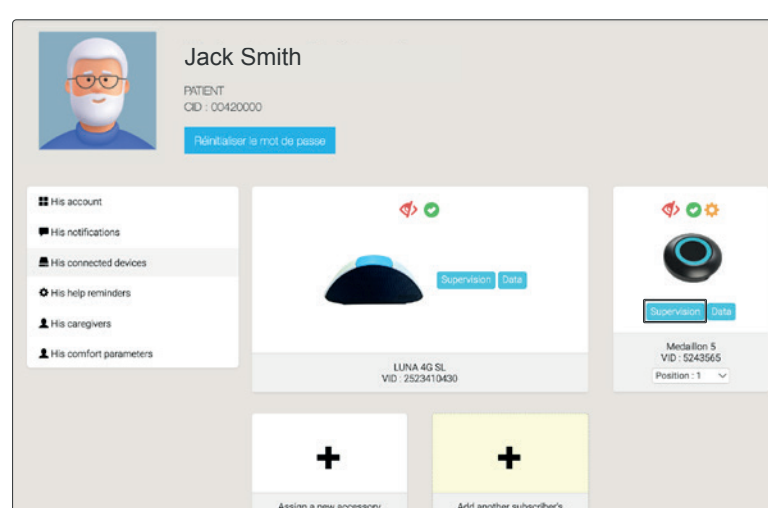

1

Go into the client's fixed or mobile device file, click on "Add a new device".

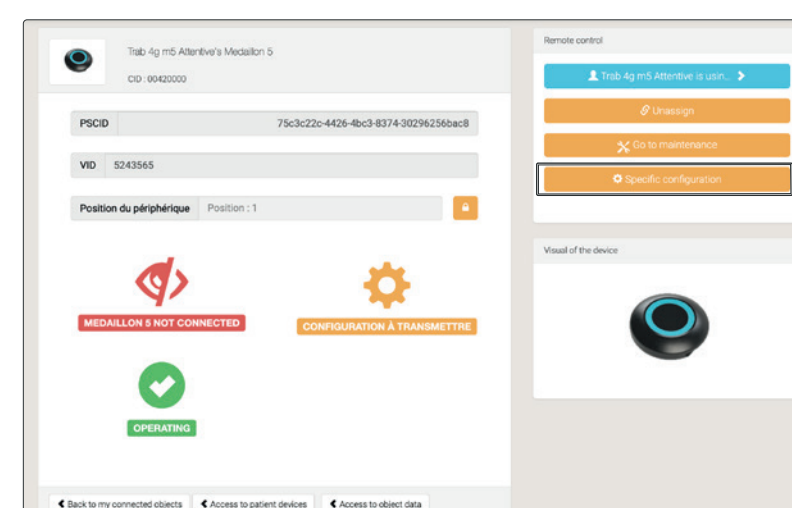

2

Insert the medallion's VID number (digits only). Click the green button to confirm. If a line appears in the drop-down menu, select it.

3

Click on "supervision" for the M5 medallion.

4

Click on "specific configuration" to set up advanced functionalities.

M5 Specific configuration

Advanced functions are configured remotely from your platform or the MyATTENTIVE app:

- ▷ Inactivity detection (time bracket)
- ▷ Activate the vibration option
- ▷ Indoor tracking (Beacon)
- ▷ Firmware update
